

## ACEPT

### Services to industry... your place or ours?

South Metropolitan TAFE is home to ACEPT – the Australia Centre for Energy and Process Training; a world-class training provider for the oil and gas, processing and resources industries. ACEPT's purpose-built training facility is located within the Australian Marine Complex, 30 minutes south of Perth city's central business district.

The energy and processing industry has traditionally trained its process operators in-house to best practice industry standards. With stronger regulatory practices, industry expansion and demand for higher skills, leading companies are now looking to a quality external provider for their workforce development needs.

ACEPT is Australia's foremost provider of skillset training solutions for process plant operations, using:

- Qualifications from the Chemical, Hydrocarbons and Oil Refining Training Package, which sets national, industry-wide skills standards
- Training that is quality assured under the Australian Qualifications Framework (AQF)
- Highly experienced trainers from industry

Services include government funded and fee-for-service programs tailored to client needs.

### SKILL RECOGNITION

Many process operators are skills via on-the-job experience and in-house training. ACEPT's recognition of prior learning enables the formal assessment and recognition of these skills under the Australian Qualifications Framework.

### MAP IN-HOUSE TRAINING TO AUSTRALIAN STANDARDS

With ACEPT's training mapping services, in-house training can now be mapped against national industry standards set out in the Chemical, Hydrocarbons and Oil Refining Training Package.

This enables:

- Companies to ensure in-house standards meet national competency standards
- Skills gaps to be identified and strategies developed to address the gaps

## CUSTOMISED TRAINING

ACEPT's training solutions include:

- Workplace training and assessment
- Open learning and on-line learning
- Skillsets (short courses)
- Off-site delivery at ACEPT's state of the art training facility
